

INSTRUCTIONS FOR COMPLETING NOTIFICATION of REGULATED WASTE ACTIVITY FORM

INITIAL NOTIFICATIONS

If you do not currently have an EPA Identification (ID) Number and you conduct a regulated waste activity at your site, you must submit an initial notification to obtain an EPA ID Number. An initial notification must be submitted if you conduct one or more of the following activities at your site:

1. If you generate, transport, treat, store, or dispose of regulated hazardous wastes;
2. If you recycle hazardous wastes. (hazardous wastes that are recycled are called recyclable materials). The recycling process itself is exempt from regulation, but you must notify the KDHE and obtain an EPA ID Number if you manage hazardous wastes prior to recycling;
3. If you are a large quantity handler of universal waste. Notification is only required for people who have **not** previously notified KDHE of any regulated waste activity; or
4. If you transport, process, or re-refine used oil, burn off-specification used oil for energy recovery, or market used oil.

If you have questions about any regulated waste activity, please call KDHE's Bureau of Waste Management (BWM) at 785-296-1600. Additional information, including this form and its instructions, is also available on BWM's website: <http://www.kdhe.state.ks.us/waste>

SUBSEQUENT NOTIFICATIONS

Even if you have submitted an initial notification and have received an EPA ID Number, you may be required to submit a subsequent notification. Kansas Administrative Regulations (K.A.R.) 28-31-4(c)(1) requires that **anytime there is a change in the information used to obtain the EPA ID Number, the generator shall submit these changes to the KDHE**. In general, you should submit a subsequent notification under the following circumstances:

1. If your business moves to another location;
2. If your business name changes;
3. If your generator classification changes;
4. If the contact person for your site changes;
5. If the ownership of your site changes;
6. If an additional owner has been added or replaced since you submitted your initial notification; or
7. If the type of regulated waste activity you conduct changes.

HOW TO FILL OUT THIS FORM

Please read and follow all instructions. Pay particular attention to information contained in **NOTE** boxes or information that is **bolded** and/or underlined. If you need assistance, please call the Bureau of Waste Management at 785-296-1600.

Type or print in black ink. For subsequent notification's, enter your site's EPA ID Number in the top right-hand corner of the second and third pages of the form. Use the space for Comments in Item 12 to clarify or provide additional information for any item. When entering information in the Comments section, please identify the item number and box letter to which the comment refers. If you must use additional sheets, please enter your site's EPA ID Number in the top right-hand corner of each additional sheet.

ITEM-BY-ITEM INSTRUCTIONS

Item 1 -- Reason for Submittal:

Reason for Submittal: Place an "X" in the appropriate box.

- **For Initial Notification of Regulated Waste Activity to provide site identification information and obtain an EPA ID Number for hazardous waste, universal waste, or used oil activities.** If your waste activity is regulated under Subtitle C of the Resource Conservation and Recovery Act (RCRA) and the Kansas regulations enacted pursuant to RCRA, you must submit this form to notify the KDHE of your regulated waste activities and obtain an EPA ID Number.
- **For Subsequent Notification of Regulated Waste Activity to update site identification information.** You must use this form to submit a subsequent notification if your site already has an EPA ID Number and you need to update your original information (e.g., generator status, new owner, new mailing address, etc.).
- **As a component of the FIRST—RCRA Hazardous Waste Part A Permit Application.** If your site is planning to treat, store, or dispose of hazardous waste on site in a unit that is not exempt from obtaining a hazardous waste permit, you must submit this form as part of the Part A Permit Application. Also, if the activity at this site (treatment, storage, or disposal) became newly regulated under RCRA Subtitle C (specifically 40 CFR Parts 260-299), you must submit this form as part of the Part A Permit Application.
- **As a component of a REVISED—RCRA Hazardous Waste Part A Permit Application.** If you must submit a revised Part A Permit Application to reflect changes that have occurred at your site, you must submit this form as part of your revised Part A Permit Application. Examples of site changes requiring a revised Part A Permit Application include managing new wastes not identified in the first submission of the form or changes to existing waste treatment processes. When submitting a revised Part A Permit Application, please include the Amendment number in the appropriate space.

- **As a component of the Hazardous Waste Report.** If you are required to submit a Hazardous Waste Report indicating the amount of hazardous waste you generate, treat, ship off-site, or receive from off-site, you must fill out this form.

Item 2 -- Site EPA ID Number:

NOTE: If this is your initial notification for this site, leave this item blank and proceed to Item 3.

Enter the EPA ID Number **assigned to this site location address.** Be sure to include your EPA ID Number at the top of pages 2 and 3 of the form and on any attachments to this form.

Item 3 -- Site Name:

Enter the legal name of the facility which is conducting business at this site.

Item 4 -- Site Location Information:

Enter the physical address or location for this site. **The address or location must be a physical address, not a post office box or route number. This is your 911 system location address.**

NOTE: Remember that a new EPA ID Number is required if you move to a new location. If your new location does not have an EPA ID Number, a new EPA ID Number will be assigned. If your new location has a previously assigned EPA ID Number, you will be issued the existing number.

Item 5 -- Site Land Type:

Place an "X" in the box that **best describes** the land type of your site. Select only **one** type: Private, County, District, Federal, Indian, Municipal, State, or Other. If Other, explain this under Comments--Item 12.

Item 6 -- North American Industry Classification System (NAICS) Code(s):

Box A must be completed. Completing Boxes B-D is recommended, if applicable.

Box A Enter the North American Industry Classification System (NAICS) code that **best describes your site's primary business production process for your products or services.** Use the six (6) digit code (most specific description) if available for your business; if not, use the five (5) digit code; **do NOT enter any 4-digit or less codes.**

Boxes B - D Enter other NAICS codes that describe the secondary business production processes for your site. Use the most specific 6 or 5 digit codes available; **do NOT enter any 4-digit or less codes.**

You can obtain NAICS Codes from the following sources:

- NAICS web sites at <http://www.census.gov/epcd/naics02/naicod02.htm> --- click on 6-Digit Codes or Select by Category.
- Some libraries, or
- Contacting the Kansas Department of Human Resources at 800-232-0484 (if you are in Kansas).

Item 7 -- Site Mailing Address:

Enter the site's mailing address. If the site's mailing address and the site's location address entered in Item 4 are the same, you may enter "SAME".

SPECIAL NOTE: All monitoring and reporting documents and other general correspondence from KDHE-BWM will only be sent to the Site Contact Person. It is assumed the Site Contact will receive mail at the Site Mailing Address. Therefore, only enter the mailing address of the Site Contact Person in this item.

Item 8 -- Site Contact Person:

Enter the name, business phone number, and extension of the person who should be contacted about information submitted on the form. A subsequent notification is required when the Site Contact Person changes.

Item 9 -- Legal Owner and Operator of the Site:

Enter the name or names of each legal owner and operator of this site. For the meaning of owner and operator, see the definitions provided in these instructions. Use Item 12--Comments and additional sheets, if necessary.

- A. Name of Site's Legal Owner:** Enter the name of each of the site's legal owner. If this is a Subsequent Notification, please enter any additional owner or any deleted owner since the last notification. Please provide dates they became or ceased being an owner.

Date Became Owner: Enter the date on which the above person or entity became the legal owner of site.

Owner Type: Place an "X" in the box that **best describes** the owner type of your site. Select only one type: Private, County, District, Federal, Indian, Municipal, State, or Other. If Other, explain under Item 12--Comments.

- B. Legal Operator:** Enter the name of your site's operator. If the same as owner, enter "SAME".

Date Became Operator: Enter the date on which the above person or entity became the operator of site.

Operator Type: Place an "X" in the box that **best describes** the operator type of your site. Select only one type: Private, County, District, Federal, Indian, Municipal, State, or Other. If Other, explain under Item 12--Comments.

NOTE: A subsequent notification is required when the owner or operator of a site changes. Because an EPA ID Number is site-specific, the new owner will assume the existing EPA ID Number assigned to the site.

Item 10 -- Type of Regulated Waste Activity:

- A. Hazardous Waste Activities:** Place an "X" in the appropriate box to indicate each hazardous waste activity being conducted **at this site**.

NOTE: Do NOT use the federal generator classifications found in 40 CFR. Use the State of Kansas generator classifications described below to complete this form.

1. **Generator of Hazardous Waste:** If you generate a hazardous waste that is listed in 40 CFR 261.31 through 261.33 or identified by one or more hazardous waste characteristic(s) contained in 40 CFR 261.21 through 261.24, place an "X" in the box corresponding to the total quantity of non-acutely hazardous waste that is generated in any **single** calendar month. Do **NOT** average over months, rather enter the highest single monthly total. The definitions for hazardous waste generators are found in K.A.R. 28-31-2(c), (d), and (e). Please refer to these definitions for details about how the regulations apply to your situation. Below is a description of the three classifications of hazardous waste generators in Kansas.

a. EPA Generator (EPA)

This site is classified as an EPA Generator if the site meets **any** of the following criteria:

- i Generates, in any calendar month, 1,000 kg (2,200 pounds) or more of hazardous waste;
- ii Generates, in any calendar month, or accumulates at any time, more than 1 kg (2.2 pounds) of acutely hazardous waste;
- iii Generates, in any calendar month, or accumulates at any time, more than 25 kg (55 pounds) of any residue or contaminated soil, waste, or other debris resulting from the cleanup of a spill of acutely hazardous waste.

NOTE: If, in addition to being an EPA Generator, you recycle hazardous wastes at your site (without storing the wastes before you recycle them), mark both this box **and** box A.4.

b. Kansas Generator (KSG)

This site is classified as a Kansas Generator if the site meets **all** of the following criteria:

- i Generates, in any calendar month, 25 kg (55 pounds) or more and less than 1,000 kg (2,200 pounds) of hazardous waste;
- ii Accumulates, at anytime, less than 1,000 kilograms (2,200 pounds) of hazardous waste;
- iii Accumulates, at anytime, less than 1 kilogram (2.2 pounds) of acutely hazardous waste;
- iv Generates, in any calendar month, or accumulates at any time, less than 1 kg (2.2 pounds) of acutely hazardous waste **and** no more than 25 kg (55 pounds) of any residue or contaminated soil, waste, or other debris resulting from the cleanup of a spill of acutely hazardous waste;

In order to facilitate future regulatory changes, KDHE is gathering additional information pertaining to the amount of hazardous waste generated by facilities in the Kansas Generator classification only. To obtain this information, KDHE has divided the Kansas Generator classification into two subclasses. The two subclasses are identified as KSG Sub-Class 1 and KSG Sub-Class 2. Place an "X" in the appropriate box to indicate which subclass corresponds to the highest monthly amount of hazardous waste generated by your site. **This does NOT change your Kansas Generator classification. Both subclasses must still follow all regulations that apply to the Kansas Generator classification.** The definition for each subclass is as follows:

- b (1) KSG Sub-Class 1: 100 kg or more and less than 1,000 kg (220 - 2,200 pounds), in any single calendar month, of non-acute hazardous waste; **or**
- b (2) KSG Sub-Class 2: 25 kg or more and less than 100 kg (55 - 220 pounds), in any single calendar month, of non-acute hazardous waste.

c. Small Quantity Generator (KSSQG)

This site is classified as a Small Quantity Generator if the site meets **all** of the following conditions:

- i Generates, in any single calendar month, less than 25 kg (55 pounds) of hazardous waste;
- ii Accumulates, at any time, less than 1,000 kg (2,200 pounds) of hazardous waste;
- iii Generates, in any calendar month, or accumulates at any time, no more than 1 kg (2.2 pounds) of acutely hazardous waste, **and** no more than 25 kg (55 pounds) of material from the cleanup of a spill of acutely hazardous waste.

NOTE: If you generate acutely hazardous wastes listed in 40 CFR 261.31, 261.32 or 261.33(e), please refer to K.A.R. 28-3104(n) to determine the circumstances under which you must notify the KDHE.

In addition to the above, place an "X" in each appropriate box to indicate other generator activities occurring **at this site**. Please mark all boxes that apply.

d. United States Importer of Hazardous Waste: Place an "X" in this box if you import hazardous waste from a foreign country into the United States. Refer to 40 CFR 262.60 for additional information.

e. Mixed Waste Generator: Place an "X" in this box if you are a generator of mixed waste. Mixed waste is waste that contains both hazardous waste and radioactive waste. Radioactive waste includes source, special nuclear, or by-product material subject to the Atomic Energy Act (AEA). Refer to RCRA section 1004(41), 42 U.S.C. 6903 (63 FR 17414; April 9, 1998).

2. Transporter of Hazardous Waste: Place an "X" in this box if you transport hazardous waste within the United States. The Kansas regulations for hazardous waste transporters are found in K.A.R. 28-31-6 and K.A.R. 28-31-10(f).

3. Treater, Storer, or Disposer of Hazardous Waste: If you treat, store, or dispose of regulated hazardous waste that is subject to a permit or interim status, place an "X" in this box. A hazardous waste permit is required for these activities. NOTE: Burning hazardous wastes in boilers and industrial furnaces and storing hazardous wastes before recycling fall into this category. For permitted activities, please contact KDHE at 785-296-1600 to request a Hazardous Waste Part A Permit Application in addition to this notification.

NOTE: If your site is a destination facility for universal wastes in addition to being a treatment, storage, or disposal facility for other hazardous wastes, mark both this box **and** box B.2.

4. Recycler of Hazardous Waste: If you recycle regulated hazardous wastes (recyclable materials), place an "X" in this box. The regulations for owners or operators of sites that recycle hazardous waste are found in 40 CFR 261.6. A hazardous waste permit may be required for this activity.

NOTE: If your site, in addition to being a recycling site for hazardous waste, is a treater, storer, or disposer of hazardous waste, mark both this box **and** box A.3. If your site is a destination facility for universal wastes in addition to being a recycling site for other hazardous wastes, mark both this box **and** box B.2.

5. Exempt Boiler and/or Industrial Furnace:

a. If you burn small quantities of hazardous waste in an on-site boiler or industrial furnace in accordance with the conditions in 40 CFR 266.108, place an "X" in this box to indicate that you qualify for the Small Quantity On-Site Burner Exemption.

b. If you process hazardous wastes in a smelting, melting, or refining furnace solely for metals recovery, as described in 40 CFR 266.100(d), or to recover economically significant amounts of precious metals, as described in 40 CFR 266.100(g), or if you process hazardous wastes in a lead recovery furnace to recover lead, as described in 40 CFR 266.100(h), place an "X" in this box to indicate that you qualify for the Smelting, Melting, and Refining Furnace Exemption.

6. **Underground Injection Control:** If you generate, treat, store, or dispose of hazardous waste and there is an underground injection well located at your site, place an "X" in this box. The regulations for owners or operators of underground injection wells are found in 40 CFR Part 148.
- B. **Universal Waste Activities:** Refer to 40 CFR 261.9 and 40 CFR Part 273 for the regulations covering universal waste.
1. **Large Quantity Handler of Universal Waste (LQHUW):** You are an LQHUW if you accumulate a total of 5,000 kg (11,000 pounds) or more of any universal wastes (calculated collectively) at any time. Place an "X" in the appropriate box to indicate the type of universal wastes you generate and/or accumulate at your site.
 2. **Destination Facility:** Place an "X" in this box if you treat, dispose of, or recycle universal wastes on site. A hazardous waste permit is required if you treat or dispose of universal wastes. A permit may be required if you recycle universal wastes.

<p>NOTE: If your site, in addition to being a destination facility for universal wastes, is also a treatment, storage, or disposal facility for hazardous wastes, mark both this box and box A.3. In addition, if your site recycles hazardous wastes, mark both this box and box A.4.</p>

- C. **Used Oil Activities:** Place an "X" in each appropriate box to indicate each used oil management activity taking place **at this site**. The Kansas regulations for used oil management are found in K.A.R. 28-31-16, which adopts by reference 40 CFR 279.
1. **Used Oil Transporter:** If you transport used oil and/or own or operate a used oil transfer facility, place an "X" in each appropriate box to indicate each used oil management activity.
 2. **Used Oil Processor/Re-Refiner:** If you process and/or re-refine used oil, place an "X" in each appropriate box to indicate each used oil management activity.
 3. **Off-Specification Used Oil Burner:** If you burn off-specification used oil fuel, place an "X" in this box to indicate this used oil management activity.
 4. **Used Oil Fuel Marketer:** If you market off-specification used oil directly to a burner, place an "X" in box 4.a. If you are the first to claim the used oil meets the used oil specification listed in 40 CFR 279.11, place an "X" in box 4.b. If either of these boxes is marked, you also must notify or have previously notified as a used oil transporter, used oil processor/re-refiner, or off-specification used oil fuel burner. If you are only a used oil generator, you are not required to notify unless you conduct any of the above used oil activities.

Item 11 -- Description of Hazardous Wastes:

You will need to refer to 40 CFR Part 261 to complete this item. Part 261 identifies those solid wastes which are defined as hazardous and regulated under the hazardous waste regulations. You may obtain information regarding the types of regulated hazardous waste by contacting the Bureau of Waste Management at 785-296-1600. This information is also available on BWM's website: www.kdhe.state.ks.us/waste Please click on the link Hazardous Waste Generators Program and then scroll down and click on Hazardous Waste Generator Handbook. The handbook may be printed or you may contact us and we will mail you a copy.

Regulated Hazardous Waste Codes: If you manage hazardous wastes that are described in 40 CFR Part 261, enter each appropriate 4-digit code in the boxes provided.

NOTE: If you need to list more hazardous wastes than will fit under Item 11, please continue listing the hazardous waste codes on an extra sheet, enter your EPA ID number on it and attach it to this form.

Item 12 -- Comments:

Use this section as needed to provide additional information for Items 1 through 11. You may attach additional sheets if necessary. Please enter your EPA ID Number on any additional pages.

Item 13 -- Certification:

This certification must be signed by owner(s), operator(s), or authorized representative(s) for the site.

NOTE: All notification forms must include this signed certification to be considered complete.

Return The Completed Form To:

**KDHE-BWM
1000 SW Jackson, Suite 320
Topeka, Kansas 66612-1366**

DEFINITIONS

The following definitions are included to help you to understand and complete KDHE Form 8700-12:

Act or RCRA means the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended by the Hazardous and Solid Waste Amendments of 1984, 42 U.S.C. Section 6901 *et seq.*

Acutely Hazardous Waste means wastes that are highly toxic commercial chemical products, off-specification chemicals, or container residues and residues from the spillage of these chemicals that are discarded or intended to be discarded. These highly toxic chemicals have been identified by EPA as always being acutely hazardous wastes when disposed. EPA has developed a list of these chemicals, called the P-list, which is contained in 40 CFR 261.33(e). These P-listed chemicals include commercially pure grades of the chemicals, any technical grades of these chemicals that are produced or marketed, and all formulations in which only one of the P-listed chemicals is the sole active ingredient. An example of an acutely hazardous waste would be a P-listed pesticide such as parathion (P089) that must be disposed. Examples of generators that generate acutely hazardous wastes are pesticide applicators, laboratories, and chemical formulators.

Authorized Representative means the person responsible for the overall operation of the RCRA site or an operational unit (i.e., part of an RCRA site), e.g., superintendent or plant manager, or person of equivalent responsibility.

Boiler means an enclosed device using controlled flame combustion and having the following characteristics:

1. The unit has physical provisions for recovering and exporting energy in the form of steam, heated fluids, or heated gases;
2. The unit's combustion chamber and primary energy recovery section(s) is of integral design (i.e., they are physically formed into one manufactured or assembled unit);
3. The unit continuously maintains an energy recovery efficiency of at least 60 percent, calculated in terms of the recovered energy compared with the thermal value of the fuel;
4. The unit exports and utilizes at least 75 percent of the recovered energy, calculated on an annual basis (excluding recovered heat used internally in the same unit, for example, to preheat fuel or combustion air or drive fans or feed water pumps); or
5. The unit is one which the KDHE has determined, on a case-by-case basis, to be a boiler, after considering the standards in 40 CFR 260.32.

Disposal means the discharge, deposit, injection, dumping, spilling, leaking, or placing of any solid waste or hazardous waste into or on any land or water so that such solid waste or hazardous waste or any constituent thereof may enter the environment or be emitted into the air or discharged into any waters, including ground waters.

EPA Identification (ID) Number means the number assigned by KDHE to each hazardous waste generator, hazardous waste transporter, and treatment, storage, or disposal RCRA site; large quantity handler of universal wastes; used oil transporter, used oil processor/re-refiner, off-specification used oil fuel burner, and used oil fuel marketer.

Hazardous Waste means a hazardous waste as defined in 40 CFR 261.3.

Hazardous Waste Generator means any person, by site, whose act or process produces hazardous waste identified or listed in 40 CFR Part 261 or whose act first causes a hazardous waste to become subject to regulation.

Hazardous Waste Storage means the holding of hazardous waste for a temporary period, at the end of which the hazardous waste is treated, disposed of, or stored elsewhere.

Hazardous Waste Transporter means a person engaged in the off-site transportation of hazardous waste by air, rail, highway, or water.

Hazardous Waste Treatment means any method, technique, or process, including neutralization, designed to change the physical, chemical, or biological character or composition of any hazardous waste so as to neutralize such hazardous waste, or so as to recover energy or material resources from the hazardous waste, or so as to render such hazardous waste nonhazardous, or less hazardous; safer to transport, store or dispose of; or amenable for recovery, amenable for storage, or reduced in volume. Such term includes any activity or processing designed to change the physical form or composition of hazardous waste so as to render it nonhazardous.

Industrial Furnace means any of the following enclosed devices that are integral components of manufacturing processes and that use thermal treatment to accomplish recovery of materials or energy: cement kilns; lime kilns; aggregate kilns; phosphate kilns; coke ovens; blast furnaces; smelting, melting and refining furnaces; titanium dioxide chloride process oxidation reactors; methane reforming furnaces; pulping liquor recovery furnaces; combustion devices used in the recovery of sulfur values from spent sulfuric acid; halogen acid furnaces, as defined under industrial furnace in 40 CFR 260.10; and such other devices as the KDHE may add to this list.

Large Quantity Handler of Universal Waste means a universal waste handler (as defined in 40 CFR 273.6) who accumulates 5,000 kilograms (11,000 pounds) or more total of universal waste (batteries, pesticides, or thermostats, collectively) at any time. This designation is retained through the end of the calendar year in which 5,000 kilograms or more of universal wastes are accumulated.

Municipality means a city, village, town, borough, county, parish, district, association, Indian tribe or authorized Indian tribal organization, designated and approved management agency under Section 208 of the Clean Water Act, or any other public body created by or under State law and having jurisdiction over disposal of sewage, industrial wastes, or other wastes.

Off-Specification Used Oil Burner means a site where used oil not meeting the specification requirements in 40 CFR 279.11 (off-specification used oil) is burned for energy recovery in devices identified in Section 279.61(a).

Off-Specification Used Oil Fuel means used oil fuel that does not meet the specification provided under 40 CFR 279.11.

On-Specification Used Oil Fuel means used oil fuel that meets the specification provided under 40 CFR 279.11.

Operator means the person responsible for the overall operation of a site. See **Person**.

Owner means a person who owns a site or part of a site, including the property owner. See **Person**.

Person means an individual, trust, firm, joint stock company, Federal Agency, corporation (including a government corporation), partnership, association, State, municipality, commission, political subdivision of a State, or any interstate body.

RCRA Subtitle C Site means the physical plant or location at which one or more of the following regulated waste activities occurs: the generation, transportation, treatment, storage, or disposal of hazardous wastes; recycling of hazardous wastes; the accumulation of 5,000 kg (11,000 pounds) or more of universal wastes; and the transportation (and temporary storage during transportation), processing/re-refining, burning, or marketing of used oil. A site may consist of several treatment, storage, or disposal operational units. A site also may consist of an area undergoing corrective action. (For entities that only transport regulated wastes, the term site refers to the headquarters of that entity's operations.)

Small Quantity On-Site Burner Exemption means that persons who burn small quantities of hazardous waste in an on-site boiler or industrial furnace, in accordance with 40 CFR 266.108, are conditionally exempt from regulation for that activity.

Smelting, Melting, and Refining Furnace Exemption means that: owners or operators of smelting, melting, and refining furnaces that process hazardous waste solely for metal recovery are conditionally exempt from regulation, except for 40 CFR 266.101 and 266.112, provided they comply with the requirements in Section 266.100(d); owners or operators of smelting, melting and refining furnaces that process hazardous waste for recovery of precious metals are conditionally exempt from regulation, except for 40 CFR 266.112, provided they comply with the requirements in Section 266.100(g); and owners or operators of lead recovery furnaces that process hazardous waste for recovery of lead and that are subject to regulation under the Secondary Lead Smelting NESHAP are conditionally exempt from regulation, except for 40 CFR 266.101, provided they comply with the requirements in Section 266.100(h).

Underground Injection Control means the subsurface emplacement of fluids through a bored, drilled or driven well; or through a dug well, where the depth of the dug well is greater than the largest surface dimension. Underground injection wells are regulated under both the Safe Drinking Water Act and the Resource Conservation and Recovery Act (see 40 CFR Part 148).

Used Oil means any oil that has been refined from crude oil, or any synthetic oil, that has been used, and as a result of such use, is contaminated by physical or chemical impurities.

Used Oil Fuel Marketer means any person who conducts either of the following activities:

1. Directs a shipment of off-specification used oil from their site to an off-specification used oil burner; or
2. First claims that used oil that is to be burned for energy recovery meets the used oil fuel specifications set forth in 40 CFR 279.11.

Used Oil Activities, for the purposes of EPA Form 8700-12, include used oil transporter and transfer facility; used oil processing and re-refining; off-specification used oil burner; and used oil fuel marketing.

Used Oil Processing means chemical or physical operations designed to produce from used oil, or to make used oil more amenable for production of, fuel oils, lubricants, or other used oil-derived

products. Processing includes, but is not limited to: blending used oil with virgin petroleum products, blending used oils to meet the fuel specification, filtration, simple distillation, chemical or physical separation, and re-refining.

Used Oil Processor means a site that processes on- or off-specification used oil.

Used Oil Re-Refiner means a site that produces lubricating oils and greases, industrial fuel, asphalt extender, gasoline, and other products from on- or off-specification used oil.

Used Oil Transfer Facility means any transportation-related facility, including loading docks, parking areas, storage areas, and other areas where shipments of used oil are held for more than 24 hours during the normal course of transportation and not longer than 35 days. Transfer facilities that store used oil for more than 35 days are subject to regulation under 40 CFR Part 279, Subpart F.

Used Oil Transporter means any person who transports used oil, any person who collects used oil from more than one generator and transports the collected oil, and owners and operators of used oil transfer facilities. Used oil transporters may consolidate or aggregate loads of used oil for purposes of transportation but, with the following exception, may not process used oil. Used oil transporters may conduct incidental processing operations that occur in the normal course of used oil transportation (e.g., settling and water separation), but that are not designed to produce (or make more amenable for production of) used oil-derived products or used oil fuel.

Return Completed Form To:

KDHE-BWM
